ARJAN SPANNENBURG

THE OBSERVER

Year: 2019

A distinguished monochrome portrait, it delves into the psychological interplay of the male gaze, capturing the delicate balance between outward strength and inner vulnerability.

SUMMARY

A distinguished monochrome portrait, it delves into the psychological interplay of the male gaze, capturing the delicate balance between outward strength and inner vulnerability. This piece explores the liminal space where the act of looking becomes scrutiny, a silent exchange between subject and spectator that feels almost tactile. In THE OBSERVER, the boundary between the viewer and the viewed is dissolved. The subject's direct, unyielding gaze compels a reversal of roles; he does not merely accept your attention...

MATERIALS

Matt plexiglas

Giclée print Ultrachrome mounted on dibond with Mat plexiglas. This finish is designed for spaces with high ambient light or large windows. The matte surface diffuses light to eliminate harsh reflections, providing a sophisticated, soft-touch finish that allows the image to be viewed clearly from any angle without a "mirror effect."

Framed with Museumglass

Fine Art print mounted on dibond and framed with museum glass in a wooden frame. The choice for the traditional collector. This combines a structural Dibond mount with the timeless elegance of a wooden frame. By using Museum Glass, we achieve 99% UV protection and a nearly invisible surface, offering the tactile warmth of a classic frame without the green tint or reflections of standard glass.

Diassec True-life

Giclée print Ultrachrome mounted on dibond with Diassec True-life. The absolute pinnacle of art production. This tier uses TruLife® acrylic, an optic-grade material similar to high-end camera lenses. It provides a stunning "liquid" depth and 3D-like colour vibrancy, while simultaneously being anti-reflective, scratch-resistant, and anti-static.

Diassec Anti-Reflex

Giclée print Ultrachrome mounted on Dibond with Diassec Anti-Reflex. An exhibition-grade finish that utilises the patented Diassec® chemical bonding process. This creates a permanent, airless seal between the print and a specialised anti-reflective acrylic. It provides the structural "monolith" look of a contemporary mount while ensuring that even under heavy gallery spotlights, the focus remains entirely on the artwork's detail.
